Re: New Testament Baptist Church & The Independent Baptist Education Society
26404 Highway 16, Parkland County, AB
New Development Permit Application

This letter is to indicate that Higher Ground Forensic Structural Engineering and Wes Snihur, P.Eng. will be involved in and assisting The New Testament Baptist Church and The Independent Baptist Education Society with their new Development Permit Application.

The scope of this project will involve the setup of a used modular ATCO office classroom unit and used ATCO Camp that will be re-purposed for educational purposes. We will evaluate the suitability of the units for the intended purposes.

We performed an initial cursory site inspection of the units and include a few photographs.

Used Modular Atco Office Building

Used ATCO Camp

Previously, our office had been involved in 2001 in the design and construction of The New Testament Baptist Church building and in 2018 of the 71' by 79' Independent Baptist Education Society Modular School.

When we were on site the two facilities were not being utilized. We are in agreement that the two building complexes are to remain locked up in secure storage pending approval of the related Development Permit Application.

We trust the information is adequate. If you have any questions or concerns, contact the writer.

Yours truly,
High Ground Forensic Structural Engineering

A handwritten signature in blue ink, appearing to read "W. R. Snihur", with a horizontal line extending to the left.

Wes Snihur, P. Eng.
